Overview

A type of person with strong work ethics and time management skills and loves problem solving, who's looking for work environment with new challenges. A team player who can communicate with English on a daily basis to interact with co-workers, research information and documents in order to complete my tasks as well as to always improve coding skills. With high adaptability to new technologies in IT industry and open-minded for new ideas.

What I'm willing to provide for company and contribute to the team:

- Analyse user needs.
- Take responsibility on multiple projects at the same time.
- Create responsive, interactive UI with UX priority.
- Work closely with designers, back-end developers and marketers.
- Develop, maintain and optimize web functionality, usability.
- Make prototypes for apps and web.
- Complete task with utmost responsibility and within strict time frame.
- Apply code convention best practices for code reusability, maintainability (Clean code, BEM)

Skills

- Fundamental HTML5, CSS3, Javascript ES6 (OOP)
- Familiarity with VueJS, ReactJS, NodeJS, NextJS
- SASS/SCSS, Material UI, Bootstrap 5
- GitHub driven development, NPM
- RESTful API, CORS
